An average of five feet of water is estimated to fall annually over the whole earth, and, assuming that condensation takes place at an average height of 3,000 feet, scientists conclude that the force of evaporation to supply such rainfall must equal the lifting of 322,000,000 pounds of water 3,000 feet in every minute, or about 300,000,000 horse power constantly exerted.

An Italian laborer of Detroit missed \$23 the other day, and after looking all over the house came to the conclusion that his dog must have swallowed it, especially as on examination he found a piece of one of the bank notes adhering to his teeth. Accordingly the dog was sacrificed and a post-mortem was held, with the result of finding all the missing money in the animal's stomach. The bills were all torn to pieces, but these were carefully fitted together and forwarded to the Treasury for redemption.

Can be looked for at the Opera-house on Friday evening, when Alfred Kelcey, supported by Colonel Theodore Hoppenheimer's London Company will present the laughing craze, "Widow Murphy's Goat." London's prima donna, Lillie LaRose, will positively appear in the part she originally created, and played for 396 performances in London. There is but very little doubt but what this attraction will call out our best class of amusement lovers as it did on the other side of the water.
